ORIGAMI Tulip Flowers

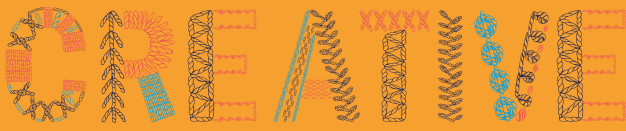

Tulips are one of the easiest origami flowers you can make and a gorgeous and fun project for all ages. This design is medium level and allows you to create a very effective flower.

Once you have the hang of one, you can make as many as you want and create bouquets of them as presents for friends and family, or just to keep yourself and brighten up your day!

Materials needed:

- 15cm x 15cm paper (from 80-120gsm). It could be patterned paper or plain colour. This will make the tulip, so think about bright colours, such as blue, pink, red, yellow, orange, etc.
- 15cm x 21cm GREEN paper. This is for making the stem.
- 7cm x 15cm GREEN paper. This is for making the leaf.
- PVA Glue/Glue Stick. To put together the stem and leaf.
- A skewer/or any thin stick. This will give the shape of the stem.
